Letter of Intent

EUSTAR - European Society of Hypertension Telemedicine in Arterial Hypertension Register

As part of the project EUSTAR a telemedical register is to be set up for patients with hypertension. An important goal of the register is to obtain a better understanding of effects, side effects, quality and costs of different therapy options for hypertension patients and to optimize the treatment using telemedicine applications.

The Deutsche Hochdruckliga e.V. DHL® - Deutsche Gesellschaft für Hypertonie und Prävention supports the goals of the register and the content of the EUSTAR project application as part of the EU program "Horizon 2020 PHC-25-2015: Advanced ICT-systems and services for integrated care".

We look forward to working with Eustar.

Kind regards,

Diplom-Volkswirt
Mark Grabfelder
